

SARANYA J

B.Tech Artificial Intelligence & Data Science | Python | Machine Learning | SQL | AI/ML
saranyaravi11.4@gmail.com | +91 6383255820 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Career Objective

Final-year B.Tech Artificial Intelligence and Data Science student with strong skills in Python, SQL, Machine Learning, Artificial Intelligence, Data Science, and software development. Seeking an entry-level Python Developer or AI/ML Engineer role to leverage programming, analytical, and problem-solving skills in developing scalable and innovative solutions while contributing to organizational growth and continuously enhancing technical expertise.

EDUCATION

2023 – 2027

B.Tech in Artificial Intelligence and Data Science

CARE College of Engineering, Trichy

CGPA: 8.0

TECHNICAL SKILLS

Programming: Python, SQL, Java

Core CS: Object-Oriented Programming (OOP), Data Structures & Algorithms

AI / ML: TensorFlow/Keras, BERT, Scikit-learn, OpenCV, MediaPipe

Data Science: Pandas, NumPy, Data Analysis

Database: MySQL, SQL, Data Warehousing

Data Analysis: Pandas, NumPy

Web Development: HTML, CSS, JavaScript, Bootstrap

Tools: Git, GitHub, VS Code

PROJECTS

Gestro — AI-Based Sign Language Interpreter

Technologies: Python, OpenCV, MediaPipe, TensorFlow/Keras, HTML, CSS, JavaScript

- Developed an AI-powered sign language interpretation system that translates hand gestures into text and speech, enabling easier communication for hearing- and speech-impaired individuals.
- Implemented hand landmark detection and tracking using MediaPipe and OpenCV to capture and process gesture patterns.
- Built and trained a deep learning classification model to identify and interpret different sign language gestures.
- Integrated text-to-speech functionality to convert recognized signs into audible responses for seamless interaction.
- Designed an interactive user interface to provide an accessible and user-friendly experience.

EcoVert — Smart Indoor Farming System

Technologies: IoT, Sensors, Hydroponics, Water Recycling, HTML, CSS

- Developed a smart indoor farming system using IoT sensors to monitor environmental conditions.
- Implemented a hydroponics-based cultivation method for soil-free plant growth.
- Integrated an automated water recycling system to reduce water consumption and improve sustainability.
- Enabled real-time monitoring of parameters such as temperature, humidity, and water levels.
- Designed the system to promote efficient, sustainable, and resource-conscious urban agriculture.

Fake News Detection System

Technologies: Python | Machine Learning | Natural Language Processing (NLP) | Scikit-learn | Pandas | NumPy

- Developed a machine learning-based system to identify whether a given news article is real or fake.
- Collected and preprocessed news text to prepare the dataset for machine learning analysis.
- Applied NLP techniques to transform textual news data into features suitable for classification.
- Trained a machine learning classification model to predict the authenticity of news content.
- Evaluated the model's performance and implemented a prediction workflow for classifying new news articles.

INTERNSHIPS

Data Warehousing & .NET Intern

AishVel Info Tech, Chennai

- Gained practical experience in SQL and .NET application development, including database design, joins, and stored procedures.
- Worked with SQL databases to perform data storage, retrieval, and query optimization.
- Explored .NET fundamentals and strengthened understanding of data warehousing concepts in a professional environment.

AI & ML Intern

Greensoft Groups, Trichy

- Gained hands-on exposure to Artificial Intelligence and Machine Learning concepts and development practices.
- Applied Python and machine learning techniques to work on practical AI/ML tasks and data-driven solutions.
- Worked through data preprocessing, model building, and evaluation as part of machine learning workflows.
- Strengthened skills in problem-solving, data analysis, and AI/ML application development.

Software Development Intern

Cognifyz IT Solutions Pvt. Ltd.

- Worked on software development tasks involving programming logic, problem-solving, and application development.
- Developed an interactive DSA quiz game using HTML, CSS, and JavaScript with user interaction and score tracking.
- Implemented logic-based programming tasks to strengthen algorithmic thinking and coding skills.
- Applied debugging and problem-solving techniques to develop and refine assigned applications.

ACHIEVEMENTS

- Best Problem Statement Award — Invente 2.0 Seed Stage (Gestro Project)

LEADERSHIP & RESPONSIBILITIES

- Vice President — ECO Care Club
- Workforce Member — Entrepreneurship Development Cell
- Executive Member -- Full Stack & Data Analytics Club

SOFT SKILLS

Problem Solving • Communication • Leadership • Team Collaboration • Time Management • Adaptability
